

Instructions for Blade Assembly Replacement for the Vita-Mix Super Blender

Please Note

In line with U.S Health and Safety Regulations Vitamix have redesigned the retainer nut that fits onto the jug. This is to avoid customers from changing or refitting their own blade assembly. This will now have to be done as a charged service by a Conglomus Service Centre technician.

To arrange your blade assembly replacement or refitting please send an image of your Vitamix Blade and Jug (be sure the handle as well as the inside of the jug is visible) to service@conglomus.co.za for further information.
